

YSHIELD® GSX50 | Grounding strap with conductive glue | Width 25 mm | 50 meter

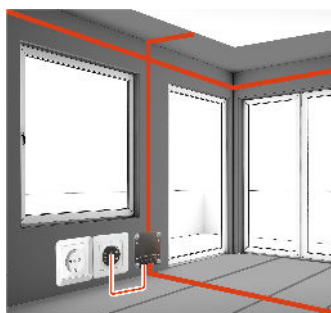

Self-adhesive grounding strap with conductive glue to bridge cracks in the underground for a long-term grounding.

YSHIELD® GSX50

YSHIELD® GSX

YSHIELD® GROUNDING

Self-adhesive grounding strap with conductive glue to bridge cracks in the underground for a long-term grounding.

On basis of our netting HNG80. Due to the electrically conductive glue, it can be glued not only UNDER, but also ON shielding paints, fleeces or nettings. Sticks even on difficult undergrounds. **With only 0.11 mm very thin** and invisible under shielding paints! For application we recommend our plastic scraper FVR10.

- **Lenght GSX10: 10 m**
- **Lenght GSX50: 50 m**
- **Width 25 mm**
- Thickness 0.11 mm
- Corrosion resistant
- Materials: Polyester, copper, nickel. Backside conductive acrylic glue with high adhesive strength
